| <b>Project</b>     | <b>E-Health Service</b> | <b>Date</b>           | 4.11.2012.                                  |
|                    |                         | <b>Start-end time</b> | 13:00 - 16:00                               |
| <b>Responsible</b> | Marko Kelava            | <b>Location /type</b> | Location: Zagreb, FER<br>Type: live meeting |

| Attended by | Location  | Remarks                                   |
|-------------|-----------|---|
| Bojan       | FER       |   |
| Petar       | FER       |   |
| Marko       | FER       |   |
| Tomislav    | FER       |   |
| Vedran      | his house | Wasn't in Zagreb so he joined us on Skype |

### 1. System architecture and technologies

We discussed the architecture we'll employ for system development, as well as technologies that are to be used.  
**CONCLUSION:** We decided to do both service and web server in MVC 4. Service can be done as Web API, which is a subcategory of MVC without views, because we do not need them for service. We will have 3 different folders/routes/URLs, one for web specific methods, one for mobile specific, and one for shared methods. We will use https and SSL to implement data encryption.

**ACTION:** Marko needs to convey the conclusion of the meeting to Stefania and Gregorio

### 2. Design

We discussed the design of the system.

**CONCLUSION:** We decided we will not use a database right away, but instead we'll use data repositories, and make a database when we know the model is right. We will meet again at Wednesday, 10am at FER to finish the document due on Friday.

**ACTION:** Marko needs to send an e-mail to Raffaella and see if it's ok to have just class diagrams instead of database model for now.
