

## Minutes of Meeting

<b>Project</b>	<b>E-Health Service</b>	<b>Date</b>	18/12/2012
		<b>Start-end time</b>	17:15 – 17:35
<b>Responsible</b>	Gregorio Perego	<b>Location /type</b>	POLIMI – T.0.3

<b>Attended by</b>	<b>Location</b>	<b>Remarks</b>
Gregorio Perego	POLIMI – T.0.3	
Stefania Pezzetti	POLIMI – T.0.3	
Prof. Raffaella Mirandola	POLIMI – T.0.3	

### 1. Requirements for final release

She said that she's really satisfied for what we did until now and suggested us to reduce requirements for final release: in particular she's not more interested in unusual alarm activities. In her new opinion first aid needs only to be able to receive alarms list and viewing details about each one.

About alarm levels she suggested us to maintain them as are (G1,T1, S1, ...), but to move "send alarm" button from patient details page to where we have all vital parameters measurements, cause alarm level is related to that. So we have to suppose that doctor decides to send an alarm only on the basis of vital parameters. At the end we spoke about HTTPS: in her opinion it's not necessary to do that.

**CONCLUSION:** Her suggestion is limit our work to complete the project (without adding useless functionalities), and start with tests and user manual: she authorized us to remove secondary functionalities from requirements document.
