

Project	POSE	Date	07/10/2010
		Start-end time	18:00 – 19:00
Responsible	Marie Christin Platenius	Location /type	Videoconference (Germany, Croatia, Sweden)

Attended by	Location	Remarks
Marie	Germany	Attend
Andre	Germany	Attend
Adnan	Germany	Attend
Jan	Germany	Attend
Dennis	Germany	Absent
Antonio	Sweden	Attend
Shaibal	Sweden	Attend
Joanne	Sweden	Attend
Jasenko	Croatia	Attend
Ivica	Croatia	Attend
Marko	Croatia	Attend
Stipe	Croatia	Attend

1. Feedback from the last presentation

Presentation was good.

2. Feedback from the workshop

Workshop was helpful.

There are no questions at the moment. All team members should ask per mail if questions come up.

3. Dates and document overview

Design description document: The document will be uploaded soon, so that it can be reviewed before the deadline expires. It should also contain some initial GUI drafts.

Alpha prototype is next delivery to work on.

4. Organizational

Alpha prototype: Two options: 1. Graphical User Interface and some simple actions, 2. Prototype without GUI but with implementation of the Use Cases. Team tends to option 1: a graphical user interface should be designed first.

Coding conventions and documentation policies: Jan posted links for implementation and documentation guidelines in the wiki (<http://www.dsd.pg-pose.de/templates>). Team has also to create a developer guide and a user guide in Eclipse online help (Eclipse PlugIn extension).

5. What's next?

First the design document has to be finished. Next the team can work with workshop code. Then Joanne and Antonio will present their ideas about the GUI. After that the team can start working on the Alpha prototype.

The IRC channel will be used more often to discuss with each other and to ask/answer questions.

Next meeting will be hold by Jan from Paderborn.

Weekly reports still to Jan on Monday 12 a.m.

The implementation tasks will be divided soon.

Current tasks:

Jasenko will study the documentation tool, the integration with the tool from Paderborn and something about persistence.

Marko and Stipe will study architecture.

Joanne and Antonio work on GUI design.

Shaibal will study EMF.

Jan will create a poll about everyone's Java skills.
