

<b>Project</b>	<b>POSE</b>	<b>Date</b>	18/11/2010
		<b>Start-end time</b>	18:00 – 19:15
<b>Responsible</b>	Marko Vitas	<b>Location /type</b>	Video-conference (Germany, Croatia, Sweden)

Attended by	Location	Remarks
Marie	Germany	Attend
Andre	Germany	Attend
Adnan	Germany	Attend
Jan	Germany	Attend
Dennis	Germany	Attend
Antonio	Sweden	Attend
Shaibal	Sweden	Attend
Joanne	Sweden	Attend
Jasenko	Croatia	Attend
Ivica	Croatia	Attend
Marko	Croatia	Attend
Stipe	Croatia	Attend

## 1. Feedback from the last presentation

The team members from Sweden and Croatia are satisfied with the presentation, with a remark from the German side that the presentation should be more detailed and that it should be written which use cases were done until the presentation. For the next presentation the German side will provide guidelines for improving presentation quality keeping in mind that the presentation has a time limit of 15 min + questions.

## 2. Beta prototype

Team members discussed what was done for the beta version since alpha version. The conclusion is that now the code needs to be tested for bugs using SWT bot, TestNG, JUnit, FindBugs or PMD. The CRO and SWE teams need to study this tools and decide which will fit best their purpose.

## 3. Dates overview

Acceptance plan test 10.12.2010.

## 4. Work division

Work will be divided in the following manner:

The Croatian team needs to finish the Patterns page in the editor and make the catalog view and description view consistent with the editor's Patterns page. The features that need to be done were published on Redmine on 18.11.2010. So the members can select a task they want to do if its not yet selected. After the Swedish team finishes the Compare and Relations view the Croatian team will integrate them in the editor.

The Swedish team needs to implement the Compare and Relations view. On Wednesday the 24 of November they must have a prototype of the Compare view done. This is an internal deadline. Joanne has to start working on the project documentation that will be merged in the eclipse help. She will contact Marie for any questions.

New internal deadlines will be set after the meeting on Wednesday between the SWE-CRO teams.

All team members need to fill an informal use case document to keep track of what has been done till now.

## **5. Open questions**

Team members discussed what tool should be used for generating diagrams in the Relations view. The German team suggested that GEF is probably too complex to learn in a few weeks and that a more realistic option should be found. The Swedish team will have to investigate this problem.

The leader of next meeting is Jan.
