1. Discussion on our presentation held on 22. 10. 2012.

CONCLUSION: It was ok, but we can improve, maybe practice through Google hangout.

2. Simulation database

There was some vagueness about purpose of database and why do we use ETH database.

CONCLUSION: Federico explained that the SCORE constraint is to use relatively big open source database and the purpose of using it is to get data for simulating traffic.

3. Our database

There was a discussion about what our database should contain.

CONCLUSION: Our database should store all received gossips and their spreading.

4. Communication technologies

CONCLUSION: We will use Bluetooth for communication between Internal car device and smartphone, and DSRC for communication between cars.
