1. Presenters for 30.10.2012.

CONCLUSION: Presentation will be held by David and Nikola.

2. Development process.

Team agreed with David's proposal.

CONCLUSION: Agile approach, where for the first Iteration and Alpha prototype we will have the Simulator, DB Parser, Android App and hopefully a DSRC prototype.

Later: Database Parser first on Week 45. Then we work simultaneously on the Traffic Simulator, the DSRC Simulator and the APP until W47 and integrate until W48 for the first prototype. Then we can decide how we will continue for the Beta Test and the Webservice.

3. Our database

We should have a publicly accessible database for ETH data.

CONCLUSION: It is possible.

ACTION: Matija will handle it.
