

Minutes of Meeting

Project	Car Gossip	Date	1.11.2012.
		Start-end time	18:00 – 20:00
Responsible	Dino Jurina	Location /type	Location: Västerås, Zagreb Type: Skype instant messaging

Attended by	Location	Remarks
Achille Penna	Västerås	
Mohammed Alserr	Västerås	
David Reypka	Västerås	
Nikola Vranešić	Zagreb	
Matija Korpar	Zagreb	
Dino Jurina	Zagreb	

1. Presenters for 6.11.2012.

CONCLUSION: Presentation will be held by Achille (Requirements) and Matija (Architecture).

2. OMNeT++ Network Simulation Framework

Matija did a research on usefulness of OMNeT++.

CONCLUSION: OMNeT++ won't be used because it isn't interactive.

3. ICD's communication in simulation

After having a talk about a ICD's communication and DSRC, we all have a clearer view on that part of project.

CONCLUSION: Some device sends message, gps coordinates and timestamp to some bearer class. Other cars' bearer classes use their receive methods which are called by sender's device if they are close enough. This idea isn't complete, it will be upgraded later because it's too simple.

4. Division into subteams

For better productivity we decided to divide our team into subteams.

CONCLUSION: Achille and David will work on car simulation data(parsing, storing into database), Matija and Dino on messages(DSRC cloud), Nikola and Mo on android application.

5. Design description

We divided tasks for Design description document.

ACTION: Everyone has to finish his tasks until Sunday, 4.11.2012.
