1. Feedback from Presentation

Andrea showed presentation of the Alpha prototype to the customers and supervisors. Customer and supervisor said that they are satisfied.

CONCLUSION: This is not the final version of the presentation.

ACTION: All team members to review it once more.

2. Report from customer by Lorenzo

We received last calculations from the customer. Forces on each pylon, risk factor for each pylon and graph for each pylon are needed. Last document about database was wrong.

CONCLUSION: So now we have all the requirements.

ACTION: Lorenzo will translate and Jorn will read document and update database.

3. Discussion on what is next to be done.

We have the presentation on Thursday, 28.11.2013. The presentations is about the alpha prototype. We have to agree all about how to present it and also to get final approval from supervisor.

ACTION: Nikola and Dzana need to send the final version of presentation asap to Andrea so he can forward it to supervisors for check. Miraldi will try to write some JUnit tests.

4. Marko Explained to group what he did in parser

Marko shortly introduced all group of what he did in the parser. The final changes made.

ACTION: Everyone has to try to understand this part on their own.

CONCLUSION: Marko faced a lot of problems working on parser, but he solved everything :)
