# **Visual Portfolio Analysis tool for Kommuninvest Summary Week Report**

**Version 1.0**

Visual Portfolio Analysis tool for Kommunivest	Version: 1.0
Summary Week Report	Date: 2017-10-23

## Revision History

Date	Version	Description	Author
2017-10-23	1.0	Summary Week Report	Stefano Cilloni

### 1. Introduction

#### 1.1 Purpose of this document

Connect with the customer in order to be able to understand better the project goal. Understand overall purpose of the visualization tool and the audience it will be targeted at.

Getting samples data documents we started to understand together with the customer which are the meaning of the information and which are they're relations among the columns.

Started to think and discuss about which technology and system architecture will suits better our project needs.

#### 1.2 Document organization

The document is organized as follows:

- Section 2 – Total Team Effort – Work Hours, Activities and tasks done by the team members
- Section 3 – Aggregated Team Data – sum of all the Work Hours, Activities and Tasks performed by the team members
- Section 4 – Main team accomplishments and problems they faced during this week

#### 1.3 Intended Audience

The Intended Audience for the report is the supervisors of the course and the lecturers responsible. Also, can be viewed by the other groups and the customer if necessary so far.

#### 1.4 Scope

This document addresses working hours and efforts spent by the team members during this week, (2017-10-17 – 2017-10-23 included)

#### 4. Major Team Accomplishments and Obstacles

- Agree for a certain hour and day to meet weekly the customer in a video call.
- Receive samples data documents from the customer.
- Understand which features of the system Mattias Bokenblom could give us information about and which ones he is not responsible for. For the latter we will have to ask to Thijmen de Gooijer (architectural configurations).
- Luca Franceschetti assigned to the Project Owner role in the Scrum process. He will be team member reference to contact the customer.
