Emanuel Guberovic	Hangouts	
Matej Vukosav	Hangouts	
Adrien Roques	Hangouts	Wi-fi crashed during the meeting
Thomas Benetti	Hangouts	Wi-fi crashed during the meeting
Sebastian Mayoral	Hangouts	

1. Progress of tasks for sprint 1

Scrum check of tasks' progress of each team member :

- Zvonimir : Started back-end with Django restful framework.
- Filip : Started front-end with an Angular template using Angular Material.
- Emanuel : Created PostgreSQL database and made data migrations from FER courses (JSON file) to database.
- Matej : Filled swagger.io with API documentation. Will continue on this task.
- Adrien : Worked on project plan documentation and created Angular template for front-end but using Bootstrap instead of Angular Material.
- Thomas : Worked on project plan documentation. Currently doing the function to search courses from keywords and rank them. Expect to finish the task on Friday.
- Sebastian : Worked on explorer page mockup and did Angular 4 tutorials during the last week.

2. Presentation of explorer page mockup

Sebastian used an online tool to create a mockup for the explorer page. It was approved by everyone as the design and the UI is modern and very nice.

3. Cross-validation of functionalities

This subject was finally not discussed during the meeting. It will be on Sunday's.

4. Progress of getting course data from POLIMI and MDH

For POLIMI, Thomas will see the referent teacher for computer science tomorrow and ask him how we can get the courses on the best format possible.
