Thomas Benetti	Skype	
Sebastian Mayoral	Skype	

1. Comment on documents

The supervisors reviewed our documents before the meeting and gave us their advice:

- Design document : OK, no comment
- Project plan document : OK, no comment
- Requirements document :
 - o Review English grammar
 - o Add version history
 - o Should we be able to implement everything without priority ?
 - o Non-functional requirements : Think about response time (time between request sent and visualization of the results)

2. Data

- MDH : Frederico sent Filip contact from administration.
- POLIMI: Raffaella will contact the person responsible of the computer science website to know if we could have data file in JSON or XML format.

3. Status report presentation (Next Tuesday)

Next presentation will be of 20 min per group. We have to talk about :

- Summary of decisions
- Describe design choices
- Scrum process and progress
- Specific work on backend

- Technologies used
- What we have really implemented (not a problem if it's not integrated)
- Show mockups or implemented stuff
