

# Minutes of Meeting

<b>Project</b>	<b>CSYLLABUS</b>	<b>Date</b>	2017-11-24
	Meeting with supervisors	<b>Start-end time</b>	2:00 PM – 3:10 PM
<b>Responsible</b>	Thomas Benetti	<b>Location /type</b>	Skype

Attended by	Location	Remarks
Ivana Bosnic	Skype	
Raffaella Mirandola	Skype	
Zvonimir Relja	Skype	
Filip Turcinovic	Skype	
Emanuel Guberovic	Skype	
Matej Vukosav	Skype	
Adrien Roques	Skype	
Thomas Benetti	Skype	
Sebastian Mayoral	Skype	

## 1. Live demo of the app

We showed our website to the supervisors, with both explorer and comparator modules.

Their feedback :

- we should add logo and name of our app into the website (make it more visible)
- we should had the possibility to use the enter key in order to launch explorer
- think more about the UX (User eXperience) because users will probably use our app in a different way that we planned
  - o Action : contact Erasmus students asap
- On comparator, should we left program variable ? Is it relevant ? Is FER the only university using this item ?

## 2. Data

- MDH : No data
- POLIMI: Just partial data that we need to use with scraping HTML from the website.

Action to persuade universities to send data => send also links to website to show them the app

## 3. Documents review

- Definition of syllabus ? Add it to requirements document
- Check English grammar on all documents (name a person responsible for that task)
- Add a quality insurance documentation (non-functional requirements) before the end of the project :
  - o How many times it takes to get data ?

- Have metrics for user interface
- How many times does it takes to restart server after a crash ?
- How many users could use the website at the same time ?
- For how many simultaneous requests the application works ?
