1. What has been done

- Emanuel, Zvonimir : started working on plugin for faculty administrators and Django authentication
- Matej : contacted the customer. He likes the website and our progress, but he refuses the current acceptance test plan (because he doesn't see enough documentation)
- Sebastian : ?
- Filip : contacted universities and got data from 1.
- Adrien : worked on front-end on comparator.
- Thomas : Wrote sprint 2 report, DSD documentation, started searches on comments plugin Disqus and started Score registration (but not finished because of some interrogations)

2. What will be done

- Emanuel, Zvonimir : plugin for faculty administrators + Django authentication
- Matej : Create documentation page (user manual) on the website of our app
- Sebastian : ?
- Filip : Create multiple courses comparison
- Thomas : Add plugin Disqus (on Angular), create unit tests on back-end
- Adrien : Front-end comparator.

3. What should we have for beta

- Django JWT authentication
- Plugin for faculties administrators
- Multiple courses comparator with reviewed design
- Comment plugin (Disqus)
- Data from 5 new universities

- More tests!
- Fix critical bugs
- Upload last version to the server and try it

4. **For next sprint (Sprint 4 : Validation)**

- Create shell script for back-end (to launch every services in one step)
- Fix bugs
- Add beta testers to the website, to get feedback from students and see if they get more bugs
