### 1. Technologies to use

We were discussing what technologies should we use for a service part of the system and mobile part of the system, what database should be used and what ORM tool, if any.

**CONCLUSION:** Service will be done in WCF, and mobile applications will be done for both WP and Android. For database and ORM tool we should wait until further requirement analysis. Bojan, Marko and Tomislav will be developing WCF service. Petar will be developing WP application. Vedran will be developing Android application.
