

Minutes of Meeting

Project	EHealth Service	Date	26-10-2012
		Start-end time	10 am – 10.30 am
Responsible	Stefania Pezzetti	Location /type	Location: POLIMI Type: face-to-face

Attended by	Location	Remarks
Raffaella Mirandola	Her office	
Stefania Pezzetti	Supervisor's office	Team Leader
Gregorio Perego	Supervisor's office	Documentation Manager

1. REQUIREMENTS

Gregorio and Stefania asked to Raffaella some questions about the Requirements. The questions are written by all team members.

The questions are about how manage the system:

- How many first aids we have?
- Can we use an administrator?
- About patients' vital parameters, can we control one parameter at a time or we have to combine some parameter?
- What are strong situations where first aid has to intervene?

CONCLUSION:

- We have just one hospital and its first aid.
- There is a system administrator that can register doctors and first aid. Doctors can register patients.
- We can control just one parameter at a time and when this parameter is out of a certain range the system warns doctors.
- Strong situations are situation in which the first aid receive a big number of emergency alarm from the same building.

2. SYSTEM AND ARCHITECTURE

We talked about the organization of the system development.

CONCLUSION: Supervisor said that first we need two guys to develop a version for the mobile application (android or windows phone), and then if they still have time, they can develop another version for the mobile application.
