

Minutes of Meeting

Project	Cycling Advocacy	Date	7-1-2020
		Start-end time	14.30-16.00
Responsible	Dominik Kotarski	Location /type	Skype

Attended by	Location	Remarks
Ivana Bosnić	FER, Croatia	FER Supervisor
Elisabetta Di Nitto	Polimi, Milan	Polimi Supervisor
Saloni Kyal	Polimi, Milan	Developer
Federico Ferri	Polimi, Milan	Developer
Sandra Kuzmić	FER, Croatia	Product Owner
Izabella Szydelko	FER, Croatia	Developer
Dominik Kotarski	FER, Croatia	Developer

1. Introduction

We show demo videos and go through presentation.

Conclusion: N/A

Action: N/A

2. Algorithm for detecting bumps discussion

Ivana: Concern about mapping the algorithm to the real conditions.

Elisabetta: Upload all trips to the local machine?

For the algorithm to work

Carlo showed a trip graph with motion data and explained the issues in motion data analysis

Two tests:

1. Is algorithm providing the right answer when the z axis goes overboard

2. Reality check, is the algorithm predicting the bumps?

Conclusion: Algorithm is still rudimentary and should be upgraded and tested if possible in the closing days of the project

Action: After the backend bug is fixed, Carlo will start working on upgrading the algorithm if possible

3. Future meetings

Elisabetta cant make it to the meeting next week.

Conclusion: Elisabetta cant make it to the meeting next week.

Action: N/A

4. Final product specification

We should clarify the scope of our work and make clear what exactly will be in the final product. We need to say that we don't have fixMyStreet in the final product

Conclusion: We should clarify the scope of our work and make clear what exactly will be in the final product.

Action: Final presentation will contain a rough overview of the app features. More details will be available in the final document.

5. Backend status

There is a bug on the backend that needs to be fixed and is blocking motion data analysis

Conclusion: There is a bug on the backend that needs to be fixed and is blocking motion data analysis

Action: The backend team will fix the bug in the coming days with it being the top priority.

6. Testing

We need to update and then complete the test acceptance document. We should also test the app independently and try to include some backend testing as well. Document unit tests in the final document

Conclusion: We need to test the app and update it on the documents

Action: Federico will be doing the test acceptance document. The whole team will test the app, unit testing will be documented in the final document by the person assigned to it.
