## login

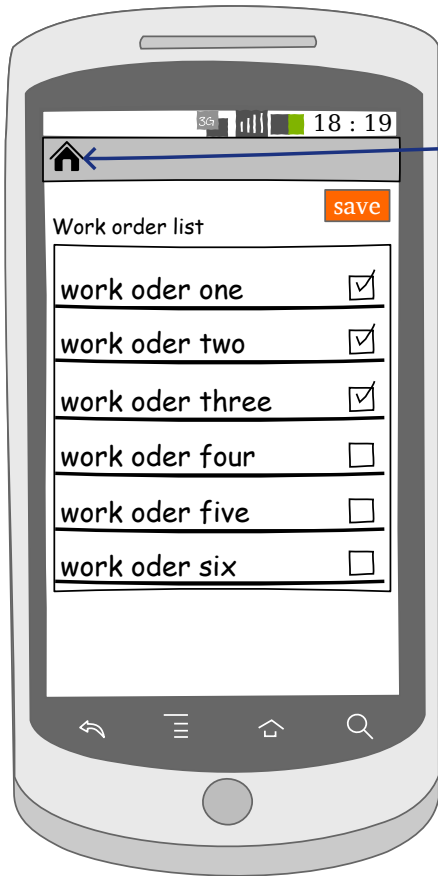

# main page

Main page with all components:

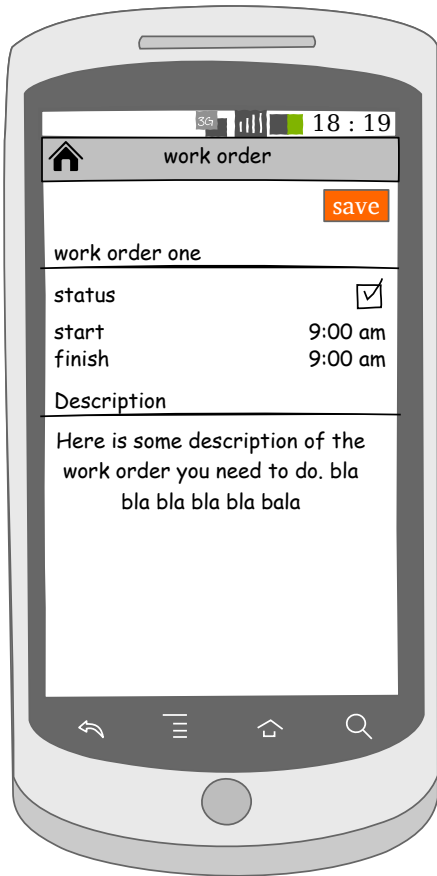

# work order list

Pressing this button brings to the main page

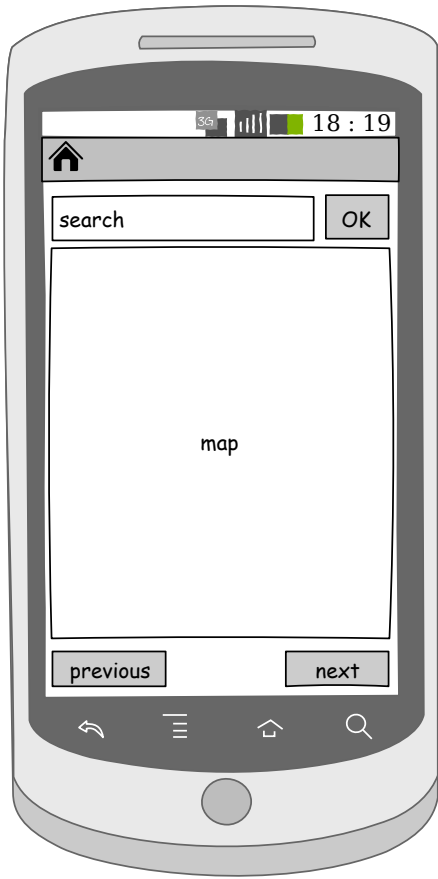

Work order list for Bo. he can mark each work orde and press save for finished work orders. clicking each work order brings to its description.

# work order description

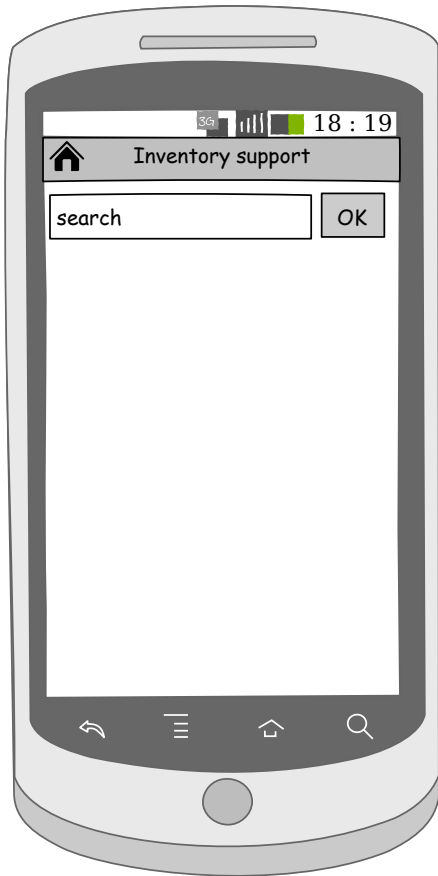

Bo can also mark work order as finished from here

# map

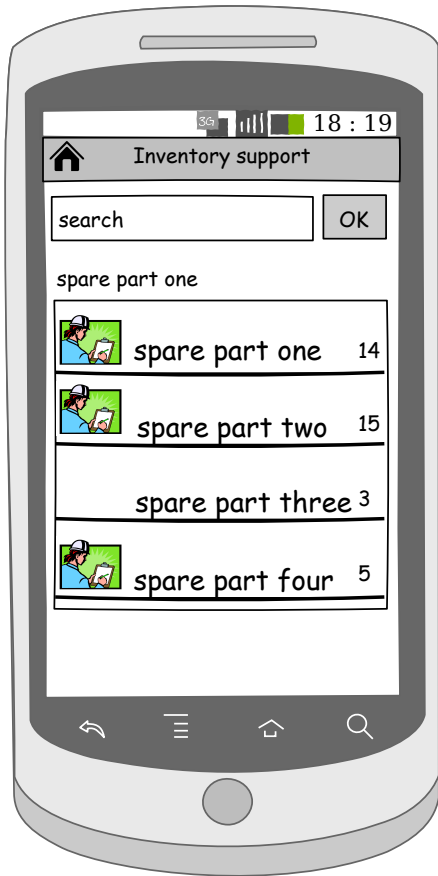

# inventory support

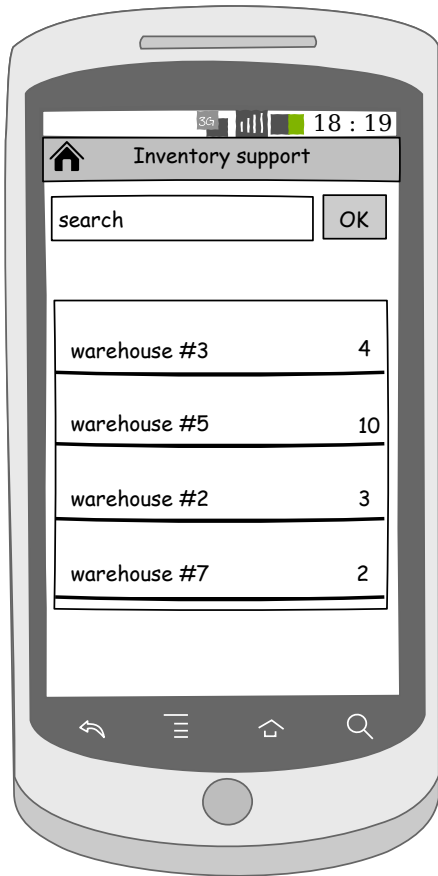

At the moment there is only search function. it will present all list of items which related to search index

# inventory support list

search results. numbers on each spare part shows  
how much available  
clicking each spare part open new page with  
warehouse list

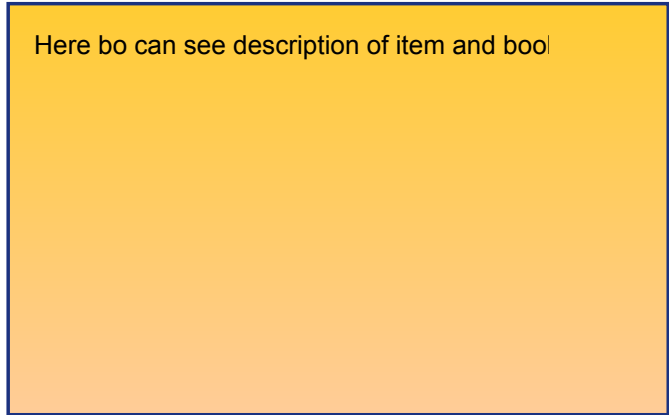

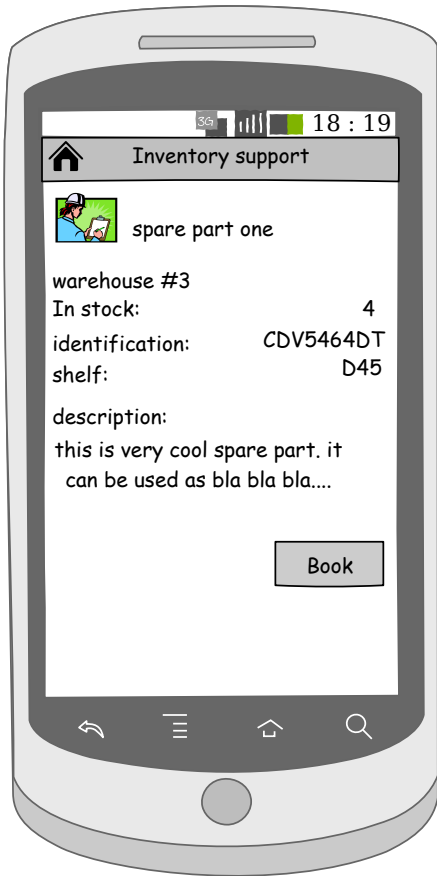

# inventory support warehouse list

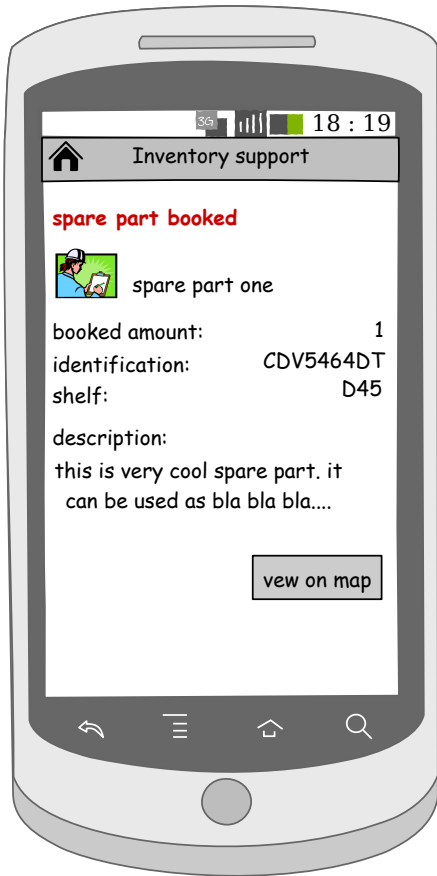

# numbers are numeric order of warehouses (names  
each number at the end shows how many items  
available on this warehouse

# inventory support description

# inventory support booked

after pressing booked. bo can see the location c  
warehouse on map
