# **CSyllabus Acceptance Test Plan**

**Version 0.5**

CSyllabus	Version: 0.5
Acceptance Test Plan	Date: 2017-12-19

## Revision History

<b>Date</b>	<b>Version</b>	<b>Description</b>	<b>Author</b>
2017-11-05	0.1	Initial Draft	Matej Vukosav
2017-11-26	0.2	Add test T-C1	Matej Vukosav
2017-12-17	0.3	Added table of content and style defined	Matej Vukosav
2017-12-18	0.4	Changed content of defined sections and filled them with more details. Tests are organized in Explorer, Comparator and Guest sections. Non-tested user stories are extracted and marked as missing.	Matej Vukosav
2017-12-19	0.5	Inserted page numbering and document information's update	Matej Vukosav

CSyllabus	Version: 0.5

CSyllabus	Version: 0.5
Acceptance Test Plan	Date: 2017-12-19

## 1. *Introduction*

### 1.1 Purpose of this document

The purpose of this document is to determine if the requirements from Requirements definition document are met based in a form of given tests that should be followed when testing of app. Every test case will cover one or more user stories copied from Requirements Document at the User Stories chapter. Every test will contain short description and instructions how tester should interact with the app in a case tester is not familiar with the app. Application is available at <https://csyllabus.com/demo/>

### 1.2 Document organization

The document is organized as follows:

- Section 1, *Introduction*, describes contents of this guide and provide general information's for whom and in a what way is this document created
- Section 2, *Test description*, general overview and purpose of tests
- Section 3, *User Stories*, lists user stories from the Requirement definition document
- Section 4, *List of tests*, describes instructions of how tests should be used
- Section 5, *Test coverage*, describes project test coverage

### 1.3 Intended Audience

The intended audience is:

- Project team
- Customer
- Product owner

### 1.4 Scope

This document will outline the plan for test activities to be performed. Each test will be

CSyllabus	Version: 0.5
Acceptance Test Plan	Date: 2017-12-19

described detailed enough so that someone else could carry out the test based on these instructions. Test will not contain any graphical content as it is prone to changes that does not affect app functionalities, but every test will describe positions of relevant elements that are tested.

## 1.5 Definitions and acronyms

### 1.5.1 Definitions

Keyword	Definitions
FER	Faculty of electrical engineering and computing

### 1.5.2 Acronyms and abbreviations

Acronym or abbreviation	Definitions
NTR	Nothing to Report. There is no available information's to a specific topic.
US[x]	User story with number #X from Requirements definition document.

## 1.6 References

This document refers to the Project Plan, Requirements and Design Description document.

## 2. Test description

Each test will define detailed instructions how to carry out the test and how test results are measured (pass/fail and what is the criteria). Tests will be related to Requirements document (with relevant requirement ID and/or name to reference the requirement). Each test will

CSyllabus	Version: 0.5
Acceptance Test Plan	Date: 2017-12-19

contain:

- test id
- test name
- tested requirements
- precondition if required
- pass/fail criteria definition
- test description
- context (if needed)
- test procedure (steps for conducting the test)

For system to be ready for production all tests must be positive. The fail of just one test determine that the system is not ready for production.

CSyllabus	Version: 0.5
Acceptance Test Plan	Date: 2017-12-19

### 3. User stories

User stories are copied from Requirement definition document for reference purpose in test list.

ID	Name	User Story
US1	Syllabus search	As a student I want to search for syllabi by name, faculty or country.
US2	Syllabus details	As a student I want to see syllabi details, so I can see what it contains.
US3	Course details	As a student I want to see details of course so I can see what they offer
US4	Faculty details	As a student I want to see details of faculty, so I can know more about faculty.
US5	Syllabi compare	As a student I want to compare my syllabi with other syllabuses
US6	Country and faculty choose	As a student I want to choose country and faculty I am studying at, so I can choose my own courses for comparison
US7	Best faculty	As a student I want to see which are the best faculties for my chosen courses of interest.
US8	Similar faculty	As a student I want to see which faculties are most similar to my own, so I can see what is my best option
US9	Relevant subjects	As a student I want to see other subjects that are relevant for me
US10	Destination country and faculty	As a student I want to choose destination country and faculty, so I can compare my courses with them.
US11	Recommended courses	As a student I want to see recommended courses, so I can maybe come to know something new
US12	Course comments	As a student I want to comment and evaluate a course
US13	Syllabus share	As a student I want to share a syllabus in social media so others can see it

CSyllabus	Version: 0.5
Acceptance Test Plan	Date: 2017-12-19

US14	Add syllabus to database	As a Professor I want to have option to add new syllabi to the database so that database can expand
US15	Personal profile	As a Professor I want to have a profile with my personal data.
US16	Most searched data	As a Professor I want to know what is the most searched faculty, subject and tag
US17	Statistics in a graphic format	As a Professor I want to see statistics data in graphic format.
US18	Guest view	As a Guest I want to see the main functionalities without an account

#### 4. List of tests

---

#### *Explorer tests*

---

<b>Test ID</b>	<b>T-E1</b>
<b>Test Name</b>	Show courses
<b>Tested requirements</b>	<b>US1</b> (As a student I want to search for syllabi by name, faculty or country), <b>US9</b> (As a student I want to see other subjects that are relevant for me)
<b>Precondition</b>	/
<b>Pass/fail criteria definition</b>	Pass criteria: - user get at least one course Fail criteria: - user did not get any data
<b>Test description and context (optional)</b>	User will test explorer search when all mandatory fields are entered.
<b>Test procedure (steps for</b>	Click on explorer image.

Comparator tests

---

<b>Test ID</b>	<b>T-C1</b>
<b>Test Name</b>	Compare my course with Italy course
<b>Tested requirements</b>	<p><b>US6</b> (As a student I want to choose country and faculty I am studying at, so I can choose my own courses for comparison),</p> <p><b>US8</b> (As a student I want to see which faculties are most similar to my own, so I can see what is my best option),</p> <p><b>US9</b> (As a student I want to see other subjects that are relevant for me),</p> <p><b>US10</b> (As a student I want to choose destination country and faculty, so I can compare my courses with them.)</p>
<b>Pass/fail criteria definition</b>	<p>Pass:</p> <ul style="list-style-type: none"> <li>- user enters all data</li> <li>- user gets result after comparison</li> </ul> <p>Fail</p> <ul style="list-style-type: none"> <li>- user get no data for comparison</li> </ul>
<b>Test description and context (optional)</b>	User from Croatia want to study in Italy. He enters data about his home faculty to be compared with faculty of his wish.
<b>Test procedure (steps for conducting the test)</b>	<ol style="list-style-type: none"> <li>1. <b>Choose compare card</b></li> <li>2. <b>Enter valid data input:</b> <ul style="list-style-type: none"> <li>- Select courses from: <b><i>“Faculty of electrical engineering and computing”</i></b></li> </ul> </li> <li>3. Add course to compare list: <ul style="list-style-type: none"> <li>- Select course at faculty for whom will comparison try to find similar courses in destination faculty:</li> <li>- Select course: <b><i>Advanced Computer Networks</i></b></li> </ul> </li> <li>4. Click on + sign next to selected course. Course will now be in a small chipset with x for deleting it from comparison.</li> <li>5. <b>Choose destination data</b> <ul style="list-style-type: none"> <li>- Compare with courses from: <b><i>University of L’Aquila</i></b></li> </ul> </li> </ol>

CSyllabus	Version: 0.5
Acceptance Test Plan	Date: 2017-12-19

	<p><b>6. Press Compare</b></p> <p><b>7. Compared courses are shown Results are showing number of similarity between two courses.</b></p>
--	--

---

*Guest view*

---

<b>Test ID</b>	<b>T-G1</b>
<b>Test Name</b>	Guest mode
<b>Tested requirements</b>	<b>US18</b> (As a Guest I want to see the main functionalities without an account)
<b>Precondition</b>	/
<b>Pass/fail criteria definition</b>	<p>Pass:</p> <ul style="list-style-type: none"> <li>- User can see explorer and comparator data without creating an account. All tests from explorer and comparator section should be available and successfully tested.</li> </ul> <p>Fail</p> <ul style="list-style-type: none"> <li>- User cannot perform all tests from explorer and comparator section</li> </ul>
<b>Test description and context (optional)</b>	Guest user can see all functionalities of explorer and comparator
<b>Test procedure (steps for conducting the test)</b>	Run every test from explorer and comparator section without a special account.

CSyllabus	Version: 0.5
Acceptance Test Plan	Date: 2017-12-19

## 5. Test Coverage

In a current version of Acceptance Test Plan described tests coverage 7 out of 18 user stories.

User stories that are yet not ready for testing: US2, US5, US7, US9, US11, US12, US13, US14, US15, US16, US17

Non-tested user stories are still under development and will be included in this document after they are finished.
