1. Project talk

Discused:

- the project scope
- the possibility and usefulness of attaining courses from ISVU API
- getting course data from FER
- possibility of building a QuiltCMS module which connects to our API

CONCLUSION:

- To many not useful course in ISVU API which are hard to attain due to legal rights
- We should get the data from FER IT and other faulties which are similar to FER in the programs it offers and are perhaps even having erasmus agreements with FER(for instance POLIMI and MDH)

ACTION

- FER IT will send as course data from FER
- CSyllabus team will contact POLIMI and MDH to get the course data from them
- CSyllabus will send a generic email to other faculties which offer similar programs as FER,POLIMI and MDH
