

  	<h1>Minutes of Meeting</h1>
---	-----------------------------

Project	RiderTrack	Date	24.10.2017.
		Start-end time	18:00-19:00
Responsible	Ante Breščić	Location/type	Zagreb

Attended by	Location	Remarks
Ante Breščić	Zagreb	In person
Josip Mališa	Zagreb	In person
Snježana Jakovina Grabar	Zagreb	In person
Goran Grabar	Zagreb	In person

Summary of meeting with GrabarSport

What GrabarSport is doing

Discussion on what company GrabarSport is about.

CONCLUSION: GrabarSport is a company which provides time measurement to participant of a race (marathon, biking, motocross, automoto, triathlon...)

Tracking event participants

Discussion about tracking equipment.

CONCLUSION: They use equipment bought from <https://www.mylaps.com/>.

There are three types of tracking devices they use:

1. Device meant for motorcycles, cars, karts,...
2. Bracelets containing chip (cca. 90\$ per unit)
3. E-tag which is on participant identification number on a shirt (cca 2\$ per unit)

How does tracking works

Discussion about event tracking setup.

CONCLUSION: Every event participant gets his identification number before the race. Their id and their name is connected with the chip they get (bracelet or e-tag). Track contains at least two checkpoints. Every time a participant passes through a checkpoint the signal goes to the decoder and it is sent to the server with info about participant and his checkpoint time.

Data visualization and formatting

Discussion about formats and visualization of data.

CONCLUSION: They are not really sure about the formats but they represent it on their web page in formats txt, pdf, csv, excel, xml...

Also, they are using apps from mylaps.com for showing live data.
