| Michal Young | Eugene | Remote |

1. Summary of the meeting:

- We showed him the heroku deployment and he was very pleased with the aesthetics of it at first sight.
 - We showed him the video of the script
 - We talked about the problems with the Spot GEN api not being documented properly.
 - He mentioned he has scraped with the SPOT GEN, and he shared his code of the small implementation he did.
 - We mentioned that we dropped the requirements of messaging and he said it was completely understandable and reasonable
 - Discussed the possibility of using FitBit, however mobile phone is needed. Also discussed other smart watches with a sim card.
- This is the direction things are evolving.
- He shared his running data as well

CONCLUSION: In general he was very pleased with the work done and agreed on everything.
