Marko Veličković	MDH (IDT)/Västeras	
Hrvoje Pavlović	Skype/Zagreb	

1. Introduce preliminary project solution and discuss current requirements

The team has presented current requirements, how they understand them for the future implementation and asked questions related to the database design. Also, every requirement is discussed in detail.

CONCLUSION:

Customers added new requirements and explained the current ones.

ACTION:

The team needs to add new requirements in the Requirements Definition Document and decide about their priorities for the implementation.
