

## Minutes of Meeting

<b>Project</b>	<b>Museumbookingsystem</b>	<b>Date</b>	22.12.2014
		<b>Start-end time</b>	17.00 – 19.30
<b>Responsible</b>	Endri Azizi	<b>Location /type</b>	Skype

Attended by	Location	Remarks
Mert Ergun	PoliMi	
Stefano Campanella	PoliMi	
Paolo Manca	PoliMi	
Alessandro Baggio	PoliMi	
Robert Engelmann	MDH	
Endri Azizi	MDH	
Sebastian Kunze	MDH	

### Sprint Daily

We talked about current project status:

- #5 - [1] Choose desired simulator  
Is done waiting for the images of simulators we put field for upload image and it will shows simulators and don't do it manually. Should be able to login example login for testing (user: shag pass: 123456789)  
Paolo Manca: Now images can be provided through the web page, so we don't need to wait Thijmen anymore.  
As always, uploading files is trickier as it should and it took me a few hours (around 6) to get this done.  
Then we created a new user story:  
#52 - [] Restrict picture size to 256 x 256
- #29 - [6] Confirm booking  
Not done yet.  
For now we just added a confirm button in the view page of a booking. Refer to the constant declared in models/booking to know the mapping between status and current implementation
- #32 - [3] Pick specific date  
Is done  
DatePicker code copied to staff/agenda page, check story\_#33 branch
- #33 - [4] View booking for a specific day  
The font should be a bit small

Much bigger fonts please!

<http://dev.bookeasy.manca.eu/index.php/staff/agenda?day=2014-12-14>

- #49 - [1] Restrict booking time slots and time spans in the past  
Is done
- #11 - [4] Block time slot  
Is done
- #14 - [4] Modify simulator's time slot  
Is done just to redefine some changes creating new stories
- #45 - [2] Create time slots  
Is done and it is restricted to all the Users
- #2 - [1] Insert booking information  
Is done
- #3 - [1] Validate booking information  
Is done, this story was related with #2. The validation is already done
- #20 - [4] Introduce permissions  
Is done, just to merge to the branch dev and to write on google drive a document how it is works.  
If you select the last simulator and hit the next day button, you are at the first simulator again.  
Error when you click on a closed timeslot, there also is an error when you click on an available booking. It will be solved.
- #48 - [1] Calculate price  
Stefano said that this story its already done on story #2  
<http://dev.bookeasy.manca.eu/index.php/parameter>
- #27 - [4] Adjust prices  
Table on database with value already set, entry fee and email of coordinator.  
Almost done, but should be completed on the next sprint
- #44 - [2] Change simulator in calendar view  
It will be done on next sprint
- #30 - [3] View calendar with all information  
This story is related to story #32
- #24 - [1] Select time span outside the opening hours  
Is done
- #28 - [2] Assign instructors
- #43 - [2] Assign yourself  
Not started yet, it will be done next sprint
- NEW story  
#51 - Rethink the time span selection from mobile devices (and implement)

## **Sprint review / Retrospective:**

- Sebastian Kunze: A lot features are done, focus on interconnection of them.
- Stefano Campanella: it has gone much better this sprint, less confusion around.
- Alessandro Baggio: Considering that we have to identify and focus the most important main functionality to the system that they are very important for our customer.  
Most functionality already implemented, what is missing is user interface that should be better, now there are just numbers table, not content well shown.  
To consider to work more on presentation on our product. Things well shown and our product will be better. Focus on interface. We have Christmas holiday and we should plan calendar of a long sprint, we are going to meet two weeks from now. Make interface for the user more intuitive and have a meeting before to deliver our product.
- Paolo Manca: We are working well and we will be in time for the project delivery.
- Mert Ergunt: He is working currently on different computer, not able to testing, I will work on testing document for the next sprint with Endri and Marco.
- Robert Engelmann: The sprint was fine and he is agree with all.
- Endri Azizi: This sprint we worked on the new users stories and our work is going good and I am agree with what my team said.

## **PLANNING**

We estimated the time for each user story

- #20 - [0.5] Introduce permissions
- #33 - [1] View booking for a specific day
- #30 - [1] View calendar with all information
- #44 - [1] Change simulator in calendar view
- #48 - [1] Calculate price
- #28 - [2] Assign instructors
- #43 - [2] Assign yourself
- #27 - [0.5] Adjust prices
- #29 - [4] Confirm booking
- #17 - [2] Create new account
- #34 - [1] Restore password
- #51 - [3] Rethink the time span selection from mobile devices (and implement)
- #54 - [3] Intuitive navigation
- #52 - [2] Restrict picture size
- #40 - [4] Overhaul user interface
- #47 - [3] Change email notification text
- #35 - [2] Create guide on how to create/use translation system
- #38 - [1] Highlight logged in instructor in calendar view

## **DECISION:**

Deadline for users stories with high priority.

Daily Meeting 28th December at 4:00 pm.

Daily Meeting 2nd January at 4:00 pm.

People that are doing testing also to produce testing documentations.

Four people to testing: Endri, Sebastian, Robert and Valerio.
