1. General

DECISION: Since a lot of team members aren't attending, there will be no Sprint Planning or Retrospective today. We will just do the Review by reviewing user stories on Asana.

DECISION: Marco will deliver the Weekly Report for the last week and for the current one. The first one will probably poor of events due to the holidays, so there will be a comment about it.

INFO: Sebastian will meet the customer (Thijmen) tomorrow around noon to show him the current version and get new feedback. He also proposes to have a team meeting tomorrow to report about it.

TO DO: Fix everything that it's possible before customer meeting.

DECISION: Team meeting tomorrow at 17.

2. Sprint Review

DONE: User Stories completed or with bugs tracked on Github are marked as done.

INFO: Mert opened a Github Ussue (#16) looking for help with his story (#28) because he can't find a way to modify the text inside the timeslot to highlight the instructor's name

IDEA: Highlight the entire timeslot (e.g. change background color), instead of just the name.

DECISION: Sebastian will check with the customer, and/or with Robert, the priority of this feature.

TO DO: Check if it is possible to increase the height of "rows" of FullCalendar to allow for larger font sizes and, eventually, smaller time slots.

TO DO: Support for translation is done, but we still have to copy all the strings into the file.

3. Final Presentation

TODD: Find out what should be in the presentation and decide who is going to present it.

DECISION: Presentation shouldn't be held by all of us (too many), we will decide who is going to in another meeting.
