## 1. Documentation

We discussed what next with the documentation. We talked a bit about the requirements documentation and design documentation.

**CONCLUSION:** We agreed that the Italian side will look into design documentation a bit, while the Swedish side will look into requirements documentation.

## 2. Technology for development

We discussed about the technology to use to represent the graphs on the UI. We mentioned a lot of libraries available and try to compare the license agreements and the quality of provided solutions.

**CONCLUSION:** We saw that chart.js from [www.chartjs.org](http://www.chartjs.org) may be the solution for us.

**ACTION:** Each of the members should look a bit more into libraries to see if we can find better alternative.
