## 1. General Yoshi architecture

The customer presented the general architecture and the features of the existing Yoshi application.

**CONCLUSION: This application is a Eclipse plug-in. It basically get from the github API the various data it needs to compute the various organisational and social metrics and evaluate the metrics. We need to improve the software in two layers:**

- **computational layer**
- **presentation layer**

## 2. Missing documents

We missed some documents about the Yoshi structure.

**CONCLUSION: The customer sended us these documents.**
