

## Minutes of Meeting

<b>Project</b>	GiftCase	<b>Date</b>	14.11.2014
		<b>Start-end time</b>	19:00-19:30
<b>Responsible</b>	Vlatko Klabučar	<b>Location/type</b>	Zagreb/Västerås

Attended By	Location	Remarks
Vlatko Klabučar	Zagreb	
Damir Tomić	Zagreb	
Aleksandra Salikiryaki	Västerås	
Giulio Cattivera	Västerås	
Ana Stepić	Zagreb	
Gijs Bos	Västerås	

- the role of the scrum master rotated to Damir
- primary means of communications Skype
- Slack for on topic discussions
- Seeing how the usage of MDE Tool has a high risk for our project, it's use will be limited only to TELCO mockup, and it will have the low priority in our backlog.
- Ana should send Slack and Kanbanize invites to Juraj and Igor
- Gijs should send an email to the supervisors about change of the scrum master
- Agreement has been met for the frontend technologies (we will use the ones listed in our req. presentation)

- We will use app42 as BaaS and C# as our backend language
- Gijs will be “Documentation master” :)
- Swedish side will do the frontend and Croatian side will do the backend
- Swedish side will start the sprint on Monday
- Gijs volunteers to do the weekly report
- github repositories: <https://github.com/GiftCase>
- Vlatko asks the customer if we could use premade recommendation capabilities of BaaS
- Giulio raised some questions about app performance, and the number of databases we should use, and system design in general
- For now, we will use only 1 database, located in BaaS. If we have performance issues we will endeavour in optimisation.
- Both teams will think about a REST interface, which methods would like to be seen, and this will be discussed later.
- The team agreed on a meeting on monday.
