

Minutes of Meeting

Project	GiftCase	Date	21.11.2014
		Start-end time	15:00-19:00
Responsible	Aleksandra Salikiryaki	Location/type	Västerås

Attended By	Location	Remarks
Aleksandra Salikiryaki	Västerås	
Giulio Cattivera	Västerås	
Gijs Bos	Västerås	

- Discussion of the front end project organization. Setting up the development environment.
 - Decision to use the skeleton provide by Cordova and Backbone.js.
 - Decision to separate the develop the views and logic (models and controllers) separately. Mock up classes with data will be created in order to allow the development of visual representation, until the logic is developed.
 - Giulio Cattivera will mainly focus on the development of the models and controllers.
 - Gijs Bos will mainly focus on the development of the views.
 - Aleksandra Salikiryaki will mainly focus on the development of the views and will also realize parts of the logic.
- Discussion of tools which should be used for the development of the front end application.

- Wonder among the Netbeans IDE + Eclipse for emulator and Sublime for IDE + Ripple for emulator.
- The strategy for development of the front end view is to use as much as possible ready solutions for different parts of the screens - for example Tabs, Lists, etc. The possible libraries are: Ratchet, Bootstrap.
- The focus of the first week of the first sprint was decided upon:
 - The initial views which will be realized are as follows.
 - Mockups of the models.
