1. Discussion about taxi registration

   Few options of taxi registration were considered.

   Conclusion: Taxis will be registered into system via web interface on server side.

   Action: Leon already implemented this kind of registration and will deploy it on azure later on.

2. Testing implemented features

   Conclusion: The team has agreed to make tests of features developed so far.

   Action: Later this day everyone will try to make some tests on developed features and let everyone know if there are any bugs.

3. Discussion about interface between customer client and server

   Conclusion: Interface will be similar to one between taxi client and server.

   Action: Members working on server and customer client will discuss this matter in details later.

4. Discussion about customer registration

   The team discussed whether customer registration is needed at this point.

   Conclusion: Customer registration will be considered later on.

Action: For now customer will send his phone number to server and taxi driver will be able to see a phone number of customer he is assigned to.

5. Next iteration

The team discussed what should be done during next week.

Conclusion: Fourth feature which is sending order from customer will hopefully be finished by next Saturday.

Action: Members in charge of customer client will start working on android application while members in charge of server will adapt web service so it can receive messages from customer client.

6. Next meeting

The team discussed about the term of next meeting in which current progress will be overviewed.

Conclusion: Meeting will be on Monday.

Action: Doodle will be set to determine exact time of Monday's meeting.
