

Minutes of Meeting

Project	Taxi Service	Date	29.11.12
		Start-end time	20:10 – 21:22
Responsible	Karlo Zanki	Location /type	Skype Voice call

Attended by	Location	Remarks
Luca Zangari	Italy	
Karlo Zanki	Croatia	
Igor Piljić	Croatia	
Jelena Jerat	Croatia	
Leon Dragić	Croatia	
Fabio Kruger	Finland	
Lyudmil Angelov	Italy	

1. Analyzing today's meeting with prof. Di Nitto

We discussed about today's meeting with prof. Di Nitto, about scalability of the solution and the project delay.

Conclusion: Short report of the meeting was forwarded to the team members that haven't attended the meeting

2. Discussion about current solution's scalability.

We agreed that we will have to do some stress testing and find out a way how to do it. An idea about using simulation, like the Car gossip team uses, was suggested.

Conclusion: There will be some problems with stress testing. An efficient way needs to be designed.

Action: We will make some approximations in testing, and try to find out some tools to do it.

3. Discussion about project delay

We are late and that is the fact. We tried to detect what was the cause of this and see how we could avoid this happening again.

Conclusion: The main reason is lack of communication, or misunderstanding between team members.

Action: We need to read daily updates more regularly. We need to give faster responses to addressed questions and/or problems. Feedback needs to be much faster. We will make QA team each week and this team will check each feature, and address detected problems.

4. Next iteration

The various teams will work to realize Feature 6 and part of Feature 5 by next Saturday. We will change the approach in ordering the taxi. Registration will be thrown out for now. We will put a restriction on maximum number of passengers to 5 persons per call.

Conclusion: Feature 4 and 5 will be completed by next Monday (alpha version will be completed).

Action: All the teams are involved in this point.

5. Next meeting

Tuesday was set to be the day for the next regular meeting, probably around 20.00.
