

Important Note: During sprint 3, the supervisor pointed out some issues in our requirements and design decisions. The key decisions taken to overcome the problems were:
 - remove the distinction between participant and organizer, having only one type of user
 - add a system administrator user that is able to manage the complete system
 Due to those changes most of the PBI are removed and substituted with a new proper version.
In this version of the product backlog we indicate which ones have been abandoned.
 Refer to PB v1.3.2 for the new list.
