Pierfrancesco Ranieri	Skype	

1. Decide secretary and agenda keeper

Dimitris Kostopoulos has volunteered.

2. Implementation Phase has begun

a. Work Division

Distribution for implementation was completed last week and all the members are notified and accept it. Rearrangement can be done after informing the responsible team leaders. This division will be followed at least on week 46.

b. Documents (Coding Policy & Trackers)

An initial guideline was created as a Coding Policy. During the development phase a few more things can be added and the document can be improved. Most of the people took a look into the coding policy document. As tracking of the issues related to bugs or implementation needs, github will be used. Furthermore, Akhlaq has created a GitHub Policy.

3. Status of the implementation components

a. Simulator

Simulator is fully functional, including the connection with the database.

b. Database

The MDH responsible gave us access to a server. The tables have been created and some basic stored procedures were created. Overall status is on going and on track.

c. BLL

The skeleton has been created.

d. DAL

DAL implementation has began and the status is on track. Basic User and Sensor data are received.

e. Mobile PL

Tutorials will be provided to Akhlaq. A skeleton will be provided to Akhlaq. Overall status: not started.

f. Web PL

Mario and Marta is in a learning phase, and Tomislav will create the skeleton before tuesday.

4. Next weeks activities

Implementation is the main focus this week.

5. Other Questions

Tomislav had another meeting, with another group. This is our only time together, try to not plan other activities during this time.

Ditmar is visiting London and has been away since Friday, He'll come back this Wednesday.
