1. Choice of implementation technologies

Final Decision between adoption of Python or .Net for the project Implementation

CONCLUSION:

We choose to adopt .Net Technologies for the project

ACTION:

FER team will work on the server side of the web application with .NET

POLIMI team will work on the client side of the web application

Alessandro and Daniele will focus more on html, css and Javascript.

Javier will also act as a "bridge" between FER and POLIMI exploiting his deep knowledge of .NET framework
