Comments / Experience / Problems

Comments:

- Week counting is from Thursday to Thursday because the meeting with the team is on Thursdays.

Experience:

- Need for ORM tools
- Better to write daily report in form of document

Problems:

- Lack of communication while changing essential parts of app

- Hard to track daily reports on FB
- Some parts of the implementation are not following documentation
- Next user stories are not finished by the end of Sprint 2:
 - UserStory5: As an user I want to change settings
 - UserStory7: As an user I want to invite my friends to use the application
 - UserStory8: As attendant I want to able to choose right time slot from me without sharing my calendar
 - UserStory111: As an user I want to manually run calculation & choose best option

In next sprints this should be avoided by providing using estimation of available time and needed time for completing individual tasks. Also this should be avoided with better daily reports, by which we will provide better tracking of project status and if necessary earlier reassign tasks.
