Comments / Experiences / Problems

- We are a bit behind on schedule because we had some bugs around to fix that didn't really allow us to complete the tasks we scheduled in this sprint
- More time was actually needed for some members of the team to learn to use the developing system than we expected
- We should work more on developing together and integrate our works without overlapping
- As soon as everyone is able to work in full on the system we should be able to recover
- As soon as integration and bugs are resolved our completeness status should be back on track, because actual features are there but not really completed
