<a href="#">322 - Administrator should be able to send notification email to site members - 3 - Done</a>						
<input type="checkbox"/>	Admin sending email	Done	0	Admin should be able to notify every user (or a group of users) with any kind of information or email so they are up to date with all possibilities in our system	Vallu Sreehari	1.6.2012 1.6.2012
<input type="checkbox"/>	Notification approval	Done	0	Admin should able to approve or disapprove Email and SMS configurations	Vallu Sreehari	1.6.2012 1.6.2012
!						
<a href="#">323 - Data archiving process must not prevent user queries - 3 - Done</a>						
<input type="checkbox"/>	Rearranging database atributes name	Done	0	Attribute names have to be consistent	Ante Ivanković	1.5.2012 1.6.2012
<input type="checkbox"/>	Query testing	Done	0	When data aggregation is done on our fact tables, we should as well think of the time that user queries take to execute. For example, if daily data mart is updated in 4pm, we should than test queries for both, that data mart, and staging area from which data is aggregated. Both table queries should not be slower than usually.	Luka Postruzin	1.6.2012 1.6.2012

[326 - Data must be available to user in short period of time - 3 - Done](#)

<input type="checkbox"/>	Query testing	Done	0	User queries should be well structured so that they acquire data in minimal time. Data tables should be partitioned, and this information should be presented to the web interface developers to know what it means. Along that, some materialized views can also be made, so that some aggregated functions (Sum, Avg,...) work better and faster.			1.9.2012
--------------------------	---------------	------	---	---	--	--	----------

<input type="checkbox"/>	Set constraints on tables	Done	0	Primary keys, foreigns keys constraints need to be set in tables	Ante Ivanković	1.5.2012	1.9.2012
