## Educations and Events in 2021

## Information on Educations and Events in 2021

### Train the trainers and business modules

Main goals of workshops and trainings are:

- 1) to explain each stakeholder its roles and position in each part of innovation ecosystem,
- 2) gather inputs based on know-how regarding collaboration activities,
- 3) to bring new ways of cooperation on the principle of triple helix model in the innovation ecosystem that will lead to the development of new products

### Living lab training

**Intention of InnovaMare project is to establish Living lab in Adriatic Sea.**

Living Lab is a research concept, representing open-innovation ecosystem that integrates research and innovation processes within a public-private-people partnership. LL generates the opportunity to start a co-creation and technology transfer between R&D institutions and SMEs. LL concept ensures the joint creation, exploration, and evaluation of innovative ideas or concepts through the pilots i.e. real-life use cases.

### Design thinking workshops

By participating in two online design thinking workshops, project partners and stakeholders will have insight in results from mapping of request and offers and presentation of best practices.

Based on these insights, together with their experience, they will define growth areas for Digital innovation HUB.

The workshops are designed to provide us inputs from stakeholders on defining needs in order to create services from which they will benefit through the established DIH.

### Breaking the surface (BTS)

BTS is a summer workshop that encourages interaction and the exchange of knowledge and experience about the field of maritime robotics and its applications. BTS is a central place for showcase of maritime technologies and cooperation and collaboration of private and scientific sector.
