

TECHNICAL LEADERSHIP PROGRAM

LEADERSHIP PROGRAM FOR STEM PROFESSIONALS

Designed exclusively for individuals with STEM background who aspire to transition into management or entrepreneurial roles

Who is this program for?

Are you a **STEM professional with min 3 years of experience**, ready to elevate your career and step confidently into leadership roles? This program is perfect for individuals with a science, technology, engineering, or mathematics background **who aspire to move into management or entrepreneurial roles**. The program will broaden their managerial and leadership perspectives while building on their professional expertise.

Program highlights

- Great balance between **technical and business perspective**
- **Project-based learning** – Bring your company's or your personal management challenge to the classroom as an TLP project, which is a key component of the program
- **Highly interactive program**, benefiting from diverse and experienced class of participants
- **World-class faculty** drawn from FER and the global network of IEDC professors
- **Creativity and high level of energy**, which bring innovative and entrepreneurial thinking into the organization

Why this program?

- Tailored specifically for STEM professionals, understanding their unique strengths
- Industry-focused curriculum that blends technical know-how with business insights.
